

# Tooling in engaging stakeholders in adaptive water management with Nature-based solutions: reflections from an online NGT approach through the perspectives of the water professionals

Borjana Bogatinoska, Angelique Lansu, Judith Floor, Dave Huitema, and Stefan Dekker  
 Faculty of Science, Department of Environmental Sciences Open University of the Netherlands

## Introduction

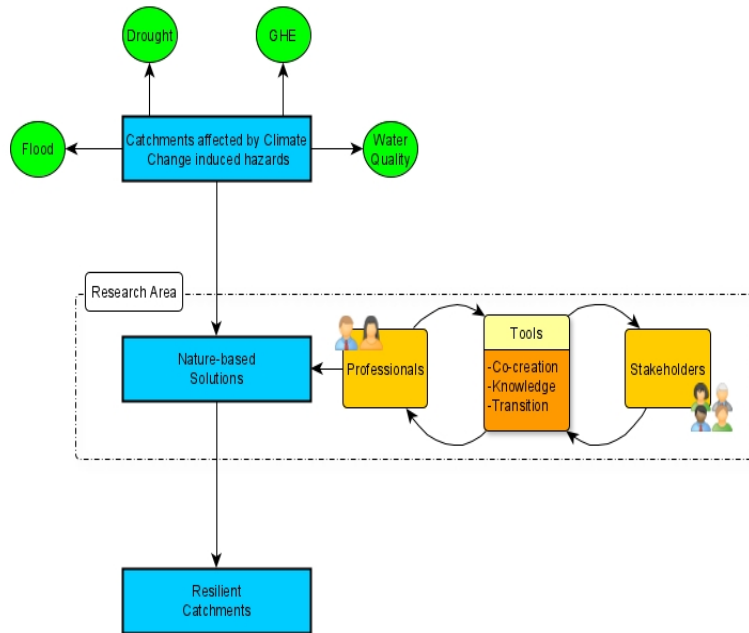

Figure 1 Research Area within the adaptation process of the catchments

## The Co-Adapt project

## Research Question

Which tools are used in the process of co-creating NbS and how can they overcome the challenges and barriers that water professionals face?

## Preliminary results

- NGT workshop

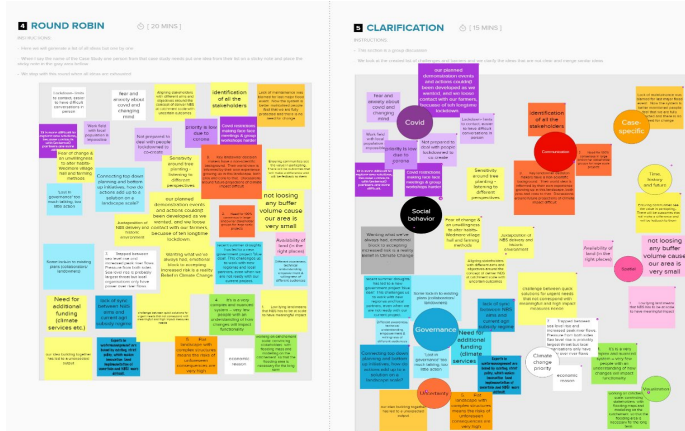

Figure 2 Last 2 stages of the NGT method (round robin and clarification)

## Challenges & barriers

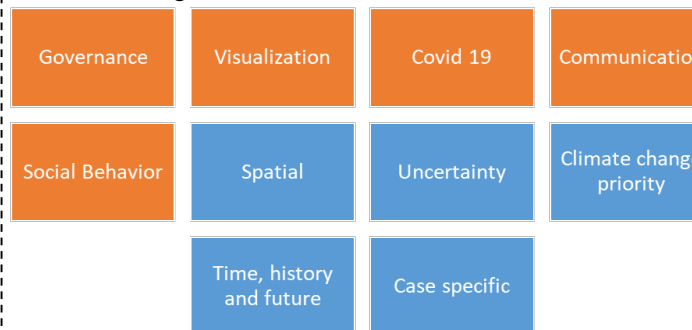

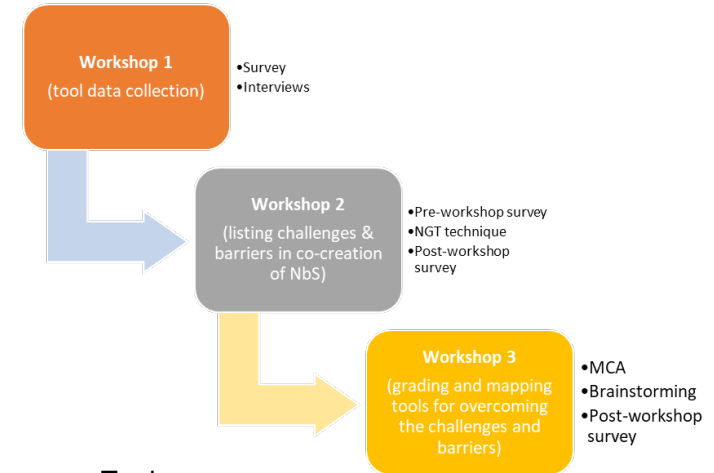

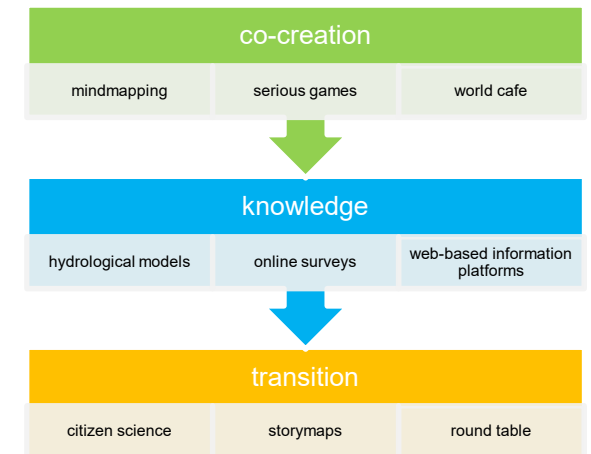

Figure 3 List of challenges and barriers (in red are the final voted)

## Methodology

- Overall methodology

## Tools

Presented at:  
 Session: ITS2.14/HS12.2 Nature-Based Solutions for Global Environmental Challenges and SDG nexus research

EGU 2021 Online Meeting
